

## Fructooligosaccharides Analysis

Fructooligosaccharides (also called oligofructose or oligofructan) are oligosaccharide fructans, which are indigestible carbohydrates.

We offer the analysis of three fructooligosaccharides.

<b>Samples</b>	<b>Health foods</b>
<b>Three fructooligosaccharides</b>	<b>1-Kestose, Nystose, Fructofuranosylnystose</b>
<b>Required Sample Amount</b>	<b>30 g</b>
<b>Turnaround Time</b>	<b>2 weeks</b>
<b>Analytical Method</b>	<b>HPLC</b>
<b>Quantification Limit</b>	<b>Solid samples: 0.05 g/100g, Liquid samples: 0.02 g/100g</b>
